Breaking News from your Break water despondent:- Waves were again reported to be lapping over

small rocks along the Brixham breakwater earlier today.

Has someone killed the Snottie

cameraman? Yes. Ed.

Freak conditions are being linked to lack of wind – globally this is not significant says Alf Fog your local donkey tail watcher, cows lying downer and sea weed fondler.

Salto does it again

Not known any year like it – as soon as conditions favour a piano and Gusset the Race Officer calls it off.

Unkind people are saying that Salto crew is "not fit for purpose" – whatever can they mean. If the purpose is being party animals I reckon they are more than a match for the rest of us! If it's sailing in heavy air after a night on the bottle I think even they would admit a lack of purpose.

Next drifting match will they be up for it? Watch and learn.

St Tom de Furz reports in fine style from Capri ...

Headlines in yesterday's Herald Express informed that the RAF are being asked to carry out a risk assessment to establish whether noise and vibration from the Red Arrows and the Typhoon fighter during Regatta could further damage fire affected properties in Dartmouth possibly causing their total collapse.

This has prompted Senior Management at BYC to question whether similar damage could be caused to BYCs facilities at Battery Point by the vast crowds that assemble each week to watch the World Series. Firecrackers, vuvuzelas and the screams from the massed spectators combine to deliver a mighty blast which often blanks out starting signals.

In addition English Heritage are worried about damage to the SW Coastal footpath caused by the rampaging crowds and have set up a special study to decide how the problem might be dealt with.

Animal rights groups are thought to be concerned about the affect on the resident seal population

Police are also known to be concerned about parking problems and congestion caused by spectators cars. A meeting of all affected parties is to be held at Middlemoor.

Torbays Mayor asked where Brixham was but added that he would bend over backwards to help if necessary
